INSECT PEST SURVEY

Bureau of Entomology, U. S. D. A.  
and  
State Entomological Agencies, cooperating.

-----  
Special Report No. 20.

January 10, 1923.  
-----

GREEN BUG IN TEXAS.  
(Toxoptera graminum Rond.)

The Bureau of Entomology's representative, Mr. E. E. Russell, has located a slight infestation of wheat by green bug in Collin County, in the northeastern part of Texas. The infestation is very limited and was first noticed on December 21. The wheat in the originally infested area was almost completely destroyed and the insects have spread for a radius of 40 or 50 yards. Parasitized specimens were quite plentiful and syrphid larvae and Coccinellidae were also present. A survey covering parts of Dallas, Collin, and Grayson Counties failed to reveal further infestations.

INSECT FIELD SURVEY

Bureau of Entomology, U. S. D. A.

State Entomological Service, cooperative

Special Report No. 20, January 10, 1923.

GREEN BUG IN TEXAS.  
(*Topogaster flavipes* Rond.)

The Bureau of Entomology's representative, Mr. F. B. Russell, has located a slight infestation of wheat by green bug in Collin County, in the northeastern part of Texas. The infestation is very limited and was first noticed on December 21. The wheat in the originally infested area was almost completely destroyed and the insects have spread for a radius of 40 or 50 yards. Examined specimens were quite plentiful and typical larvae and Coccinellids were also present. A survey covering parts of Dallas, Collin, and Grayson Counties failed to reveal further infestations.
